

## **Turnkey Assignment**

### **Documentation on Ordering & Other Details**

This documentation applies if you would want your store be developed by us on Turnkey basis.  
[ecommercehosted.com](http://ecommercehosted.com)

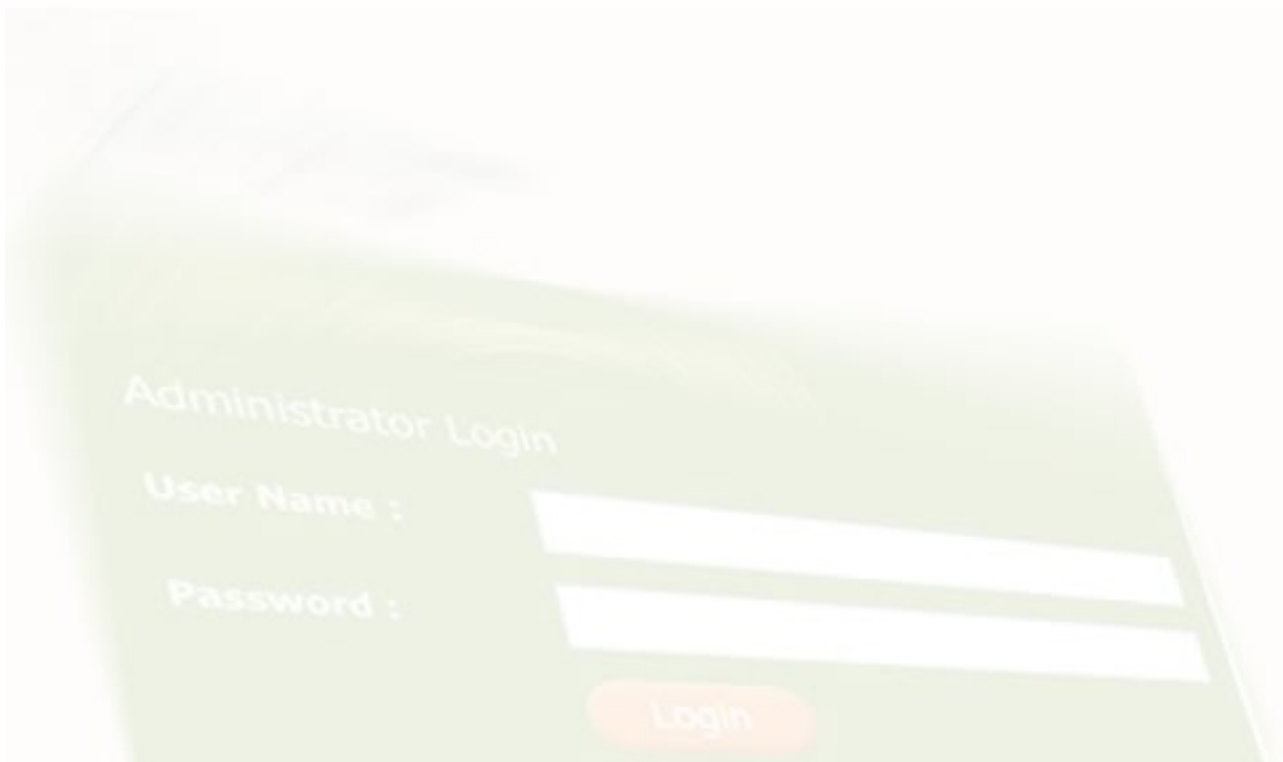

### Turnkey Assignment - Ordering Process/Steps

1. Signup for a plan of your choice.
2. Include SSL Certificate also in your order.
3. Complete the ordering process
4. Pay for your order and complete the payment process.

One time cost of design integration, store configuration including shipping, taxes, categories, adding 25 products with any product options, setting up wholesale prices, setting up discount coupon etc is US \$ 1415.00 (in addition to your plan that you signed up for).

Once your ordering for plan, ssl is completed we will install the software. We will also send you a mail if you are interested in Turnkey Assignment and once you confirm then following will be te payment schedule for the payment of \$1415.00 and invoices would be added to your account as project progresses:

- |    |   |               |
|----|---|---------------|
| 1. | 50% of 1415.00 advance before start of work                       | : US \$707.50 |
| 2. | 25% upon design integration and setup of category and 25 products | : US \$353.75 |
| 3. | 25% before taking the store live                                  | : US \$353.75 |

### Our scope of work includes following

- Store Installation: We do the installation of the store with sample data.
- Design selection: We send you a URL to choose any design from there which suits your taste and give us the template number. We will then integrate the design to the store, do changes to the template to make it suitable for 1024 resolution minimum and also modify sections of design which need changes to be compatible with the store software.
- Setting Up Categories and Products: We create the Category/Subcategory structure complete with thumbnail icon, Category title, keywords, meta description, description that goes on the category page. Once Category /Subcategory structure is completed we setup 25 products distributed across the category/subcategory tree complete with thumbnail, product image, detailed images of product, pricing, weight, wholesale pricing, setting up product options as required.
- Configuring Advance Search: If search filtering based on price range and weight range is desired we do that also.
- Setting Up Shipping Zones: setting up shipping zones as per requirements given by you within the possibilities of the store software.
- Setting Up Taxation: Taxation rules are defined so that the taxes are computed correctly once the customer is authenticated.
- Configuring the Modules: Configuring all the Add On Modules which are deployed on default store as per your plan bought.
- Setup of Payment Gateway: PaypalPro integration and live testing.
- Order Lifecycle testing: Test Mail flow based on the Order Lifecycle phases.
- Product/Category Management Training: We setup 25 products. You can setup the rest and while doing so if there are any queries we will help on the same.
- Setting up Related Products: Setting up related products for any given product. This is part of cross selling feature which is available in every store.
- Setting up "Featured" Product: on per category basis (as applicable). This would be based on the 25 products data that we add as part of assignment.
- Final Testing: Once store is ready to be taken live, final testing with customer signup, order, order execution, payment processing.
